Position:	Braider Operator	**Business Unit:**	Manufacturing
Reports To:	Kevin Jones	**Function:**	
Salary Grade:		**Location:**	Coax Cell – Manufacturing
Target Bonus:			

Summary of Position:

Involved in the planning of work to meet pre-determined schedules. Alters work plans and re-assigns work to compensate for expedited schedules, processing problems, absenteeism or other items that cause the work to not flow according to plan. Analyzes product attributes and determines process adjustments to bring product to spec, if necessary. Participates in the quality improvement process as it relates to the braiding, serving or bobbin winding operations, and use of the product manufactured. This job classification often requires running a large machine base and requires problem-solving skills to keep the equipment running effectively.
