

## CAN YOUR CABLES AND WIRES HACK IT?

Today, everything requires more bandwidth: 4K Video Distribution, Digital Signage, even Video Surveillance Systems, and our Cat 6A Unshielded Twisted Pair Cables are up to the task.

Available in plenum and riser types in 6 colors, they offer superior performance in high bandwidth applications and include the support you've come to expect from West Penn Wire for all your low voltage requirements.

At West Penn Wire, our UTP cables feature a data rate of 10 Gigabits per second, exceed the TIA/EIA-568 standard and provide up to 625 MHz of proven channel bandwidth.

***When it comes to data access and transmission, we're up to the challenge.***
